

Fortalex TRIO

DESCRIPTION

FORTALEX TRIO, is a self-defence inducer that provides copper, zinc and manganese complexed with aluminium lignosulphonate.

Its application prevents and corrects microelement deficiencies and activates the plant's defence mechanisms, thanks to the elicitor effect generated by Aluminium Lignosulphonate, which acts as a signal for the plant to activate its natural defence system by generating Phytoalexins which are capable of actively responding to numerous pathogen attacks, reducing their incidence and increasing the plant's strength and response capacity.

FEATURES

- Promotes the synthesis of phenolic substances and phytoalexins, which are created by plants as a self-defence mechanism.
- Phytofortifying effect against various pathogens produced by fungi and bacteria.
- Boosts the growth and vegetative development of the crop.
- Systemic antioxidant action.
- Palliative effect on vascular fungi, preventing their development.
- Zinc, Manganese and Copper deficiency corrector.

PROPERTIES

DECLARED CONTENT

EC FERTILISER, COMPLEXED COPPER	p/p
Copper (Cu) Complexed with Lignosulphonates	2,0 %
Zinc (Zn) Complexed with Lignosulphonate	1,0 %
Manganese (Mn) Complexed with Lignosulphonate	1,0 %
pH	3
Density	1,20 g/cm ³

OPTIONAL INFORMATION

Contains aluminium lignosulphonate

OK

Fortalex TRIO

HANDLING AND DOSAGE INSTRUCTIONS

DOSE TO IRRIGATION WATER: 2 -3 l/ha and application. Several applications are recommended throughout the growing season.

RECOMMENDED APPLICATION PER CROP

CROP	Dose/Application	Applications/Frequency
Fruit and citrus trees	2-2,5 l/Ha	2 to 4 Applications.
Horticulture	2-2,5 l/Ha	2 to 4 Applications.
Ornamentals	2-2,5 l/Ha	2 to 4 Applications.

FUNGAL DISEASES WHERE FORTALEX ACTS AS A DEFENCE ACTIVATOR

Mainly those that are generated at the neck and root level such as:

Fusarium - Phytophthora infestans - Pythium sp - Rhizoctonia - Estephylum - Sclerotinia sclerotiorum etc
