

# AlgaDun

## DESCRIPTION

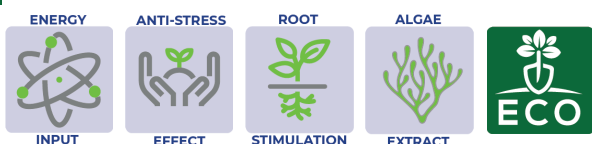

**ALGADUN** is a biostimulant based on the properties conferred by the algae extract obtained from "Ascophyllum nodosum", prepared for both foliar and root application. Its rich content in carbohydrates, fitohormones and polysaccharides, induces in plants a great response to different stress situations. It produces a faster, more vigorous and balanced development.

## FEATURES

**ALGADUN**, due to its active components, it is involved in numerous metabolic processes in plants, activating overall plant growth and acting as a catalyst of multiple processes that enhance their development and response to plant needs.

- Enhances nutrient utilisation processes.
- Its application has a notable effect in demanding phenological moments, such as flowering, fruit set and fattening.
- Prevention of abiotic stress. (Salinity, drought, frost, etc.)
