

Dunyaquel

Boro

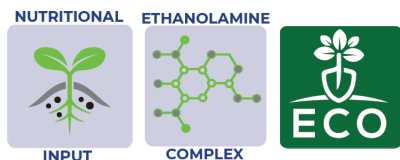

DESCRIPTION

DUNYAQUEL BORO, liquid solution of Boron Ethanolamine, highly soluble and assimilable by crops. Its formulation with Ethanolamine provides high stability to Boron, favouring its absorption through the leaf cuticle. Ensuring the mobility and translocation of Boron inside the plant.

FEATURES

Boron is one of the so-called essential microelements, and its presence is necessary to be able to cover the vegetative cycle in all crops. We can highlight among its main characteristics: the influence of this microelement in important aspects such as the translocation of sugars to the reserve organs, the growth of the meristems and the direct intervention in the processes of flowering, fertilisation and the fertilisation and fruit set.

PROPERTIES

DECLARED CONTENT

EC FERTILISER 1:1 BORON ETHANOLAMINE	m/m
Boron (B) water soluble	10,0 %
pH	7

HANDLING AND DOSAGE INSTRUCTIONS

- **Stone, pome and citrus fruit trees** apply in pre-flowering, petal fall and nut size fruit.
- **Beetroot**, apply when the crop has sufficient leaf mass with 6-8 leaves.
- **Olivar**, treat in spring before flowering.
- **Vineyard**, apply at the stage of visible bunches, pre-flowering and fruit set.
- **Horticulture** apply during the growth phase, with sufficient leaf mass and before the beginning of flowering.
- **Flowers and ornamentals**, apply with sufficient leaf mass and repeat after 15 days.

RECOMMENDED APPLICATION PER CROP

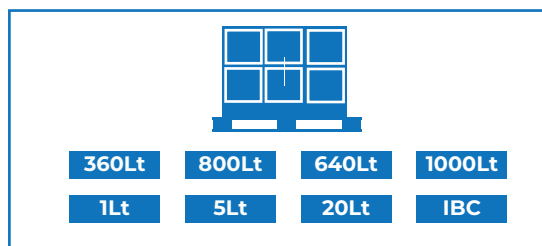

CROP	Dose/Application	Dose/Application
Fruit and citrus trees	1,5-2 l/Ha	3-6 l/Ha
Horticulture	1-2 l/Ha	3-6 l/Ha
Ornamentals	1,5-2 l/Ha	3-6 l/Ha
Olive tree	2-3 l/Ha	3-6 l/Ha
Vineyard	1-2 l/Ha	3-6 l/Ha
Leguminous plants	1-2 l/Ha	3-6 l/Ha
Beetroot	1-2 l/Ha	3-6 l/Ha
Potato	1-2 l/Ha	3-6 l/Ha
Alfalfa	1-2 l/Ha	3-6 l/Ha
Cauliflower, Broccoli	1-2 l/Ha	3-6 l/Ha
