

Dunyaquel

Mn

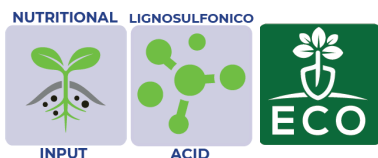

DESCRIPTION

DUNYAQUEL MANGANESO, a Manganese deficiency corrector, is a highly soluble liquid solution that can be soluble and assimilable by crops. Its complexing by means of lignosulphonic acid provides it with a high stability, favouring its absorption. This ensures effectiveness and speed of action as well as its effect on the crop.

FEATURES

The application of **DUNYAQUEL Mn**, corrects and prevents Manganese deficiencies that occur on a regular basis due to factors affecting availability and absorption, low temperatures, high pH soils, antagonisms, low soil levels, high production levels, etc. Under these conditions the probability of finding Mn deficiencies is higher. Its formulation with lignosulphonates biodegradable organic polymers of natural origin. It has the capacity to complex the Mn, giving it stability and preventing it from being blocked in the soil or on the leaf surface, thus favouring its availability to plants. Lignosulphonate in turn has a stimulating effect on plant tissues and is biodegradable. It is also biodegradable.

PROPERTIES

DECLARED CONTENT

MANGANESE (Mn) FERTILISER SOLUTION.	m/m
Water-soluble Manganese (Mn) Oxide	7,0 %
Manganese (Mn) oxide complexed by LS	3,5 %
pH	6
Density	1,24 g/cm ³
Stability interval complexed fraction	4-9

GENERAL HANDLING INSTRUCTIONS AND DOSAGES

Foliar application: 200-400 cc/hl, depending on the degree of deficiency or deficiency.
Application to irrigation water: 5-10 l/ha distributed in several applications depending on the level of deficiencies. Apply by foliar spraying in preventive applications.
 Apply 2-4 applications throughout the crop cycle, according to needs and development.

RECOMMENDED APPLICATION PER CROP

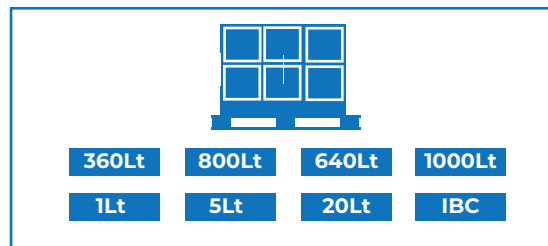

CROP	Dose/Application	Dose/Application
Fruit and citrus trees	2-4 l/Ha	3-5 l/Ha
Horticulture	2-3 l/Ha	3-5 l/Ha
Ornamental plants	2-4 l/Ha	3-5 l/Ha
Olive tree	2-4 l/Ha	4-6 l/Ha
Vineyard	2-3 l/Ha	2-4 l/Ha
Extensives	1-3 l/Ha
