

Dunyaquel

Zn

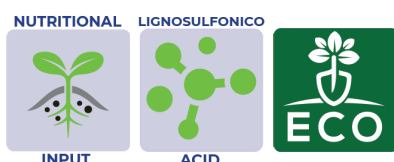

DESCRIPTION

DUNYAQUEL ZINC, is a Zinc deficiency corrector, a highly soluble liquid solution that can be assimilated by crops. Its complexing by means of lignosulphonic acid gives it a high stability, favouring its absorption. This ensures effectiveness and speed of action as well as its effect on the crop.

FEATURES

The application of DUNYAQUEL ZINC, corrects and prevents Zinc deficiencies that occur on a regular basis due to factors affecting the availability and absorption, low temperatures, soils with pH antagonisms, low soil levels, high production levels, etc. high pH, antagonisms, low soil levels, high production levels, etc. Under these conditions, Zinc deficiencies are more likely to be found. Its formulation with lignosulphonates biodegradable organic polymers of natural origin has the capacity to complement the Zinc, giving it stability and avoiding its blockage in the soil or on the leaf surface, favouring its availability to the plants. Lignosulphonate in turn has a stimulating effect on plant tissues and is biodegradable. It is also biodegradable.

PROPERTIES

DECLARED CONTENT

ZINC (Zn) FERTILISER SOLUTION.	m/m
Water-soluble zinc oxide (Zn)	7,0 %
Zinc (Zn) oxide complexed by LS	3,5 %
pH	6
Density	1,24 g/cm ³
Stability interval complexed fraction	4-9

GENERAL HANDLING INSTRUCTIONS AND DOSAGES

Foliar application: 200-400 cc/hl, depending on the degree of deficiency or deficiency.
Application to irrigation water: 5-20 l/ha distributed in several applications depending on the level of deficiencies. Apply by foliar spraying in preventive applications.
 Apply 2-4 times during the crop cycle, according to needs and development.

Dunyaquel

Zn

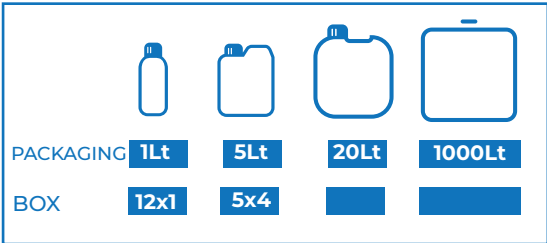

RECOMMENDED APPLICATION PER CROP

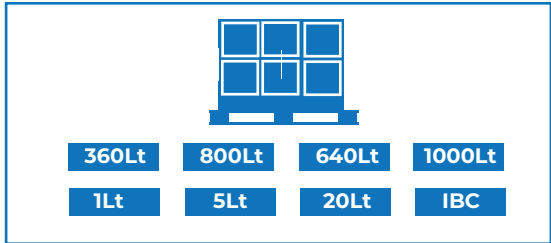

CROP	Dose/Application	Dose/Application
Fruit and citrus trees	2-4 l/ha	3-5 l/Ha
Horticulture	2-3 l/ha	3-5 l/Ha
Ornamental plants	2-4 l/ha	3-5 l/Ha
Olive tree	2-4 l/ha	4-6 l/Ha
Vineyard	2-3 l/ha	2-4 l/Ha
Extensives	1-3 l/Ha
