

HipoCa

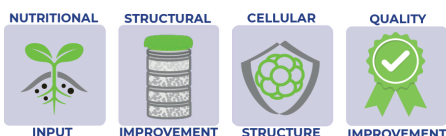

DESCRIPTION

HIPOCA, is a Calcium corrector, in Superconcentrated liquid form. Its application is ideal to provide calcium to crops and thus reduce the physiopathies that occur due to a lack of this element in many crops. The application of HIPOCA, at times of high demand for this element by the reserve organs, reduces the problems caused by its deficiency.

FEATURES

- **Reduces physiopathies** caused by calcium deficiency.
- **Increases cell wall consistency and tissue** firmness.
- Improved fruit **handling and preservation**
- Improvement of the physical and chemical properties of soils. Structure.
- Calcium source, totally active and easily assimilated by the plant.
- Formulation with a **very high concentration of soluble calcium**.
