

# Simba

## DESCRIPTION

**SIMBA**, is made up of totally assimilable Levorotatory Free Amino Acids of the highest quality. Its balanced balance of Peptides, Polypeptides and Amino Acids form a biostimulant complex with a high activity on the metabolic processes of the crops where it is applied.

## FEATURES

Its formulation contains COADYUVANTS, which give it special characteristics, notably improving its effectiveness when applied by foliar application, enhancing its adherence and persistence in plant tissue.

The application of SIMBA improves the response of plants to stress situations, whether caused by phenological moments that require a high energy cost, such as flowering, fruit setting and ripening, or by other causes such as temperature, pests, drought, salinity, etc. This allows the plant to overcome these situations and achieve maximum yields.

## PROPERTIES

## DECLARED CONTENT

| SPECIAL FERTILISER, AMINO ACIDS. Group 4.1.01 (R.D. 506/3013) | p/p    |
|---|--------|
| Free Amino Acids  | 10,0 % |
| Total Nitrogen (N)  | 8,8 %  |
| Organic Nitrogen (N)  | 8,5 %  |
| pH  | 6,5    |

**AMINOGRAMA %:** A.Aspártico 0,4% - A.Glutámico 0,6% - Alanina 1,5% - Arginina 0,1%  
Cisteína 0,53% - Fenil Alanina 0,4% - Glicina 4,0% - Hidroxiprolina 0,6% - Histidina 0,53%  
Isoleucina 0,3% - Leucina 0,2% - Lisina 0,2% - Metionina 0,1% - Prolina 0,7% - Serina 0,2%  
Tirosina 0,6% - Treonina 3,44% - Valina 0,1%

## HANDLING AND DOSAGE INSTRUCTIONS

**Simba®** is compatible with most fertilisers and pesticides commonly used in agriculture. Do not mix with sulphur, mineral oils, cupric and organocupric products and alkaline products. Given the variety of plant protection products that can be used, it is advisable, in case of doubt, to carry out a prior compatibility test or to consult the technical service. **Do not apply on Plum tree.**

## RECOMMENDED APPLICATION PER CROP

| CULTURE                | Dose/Application | Dose/Application |
|------------------------|------------------|------------------|
| Fruit and citrus trees | 3-4 l/Ha         | 8-10 l/Ha        |
| Horticulture           | 2-4 l/Ha         | 6-8 l/Ha         |
| Ornamental plants      | 3-4 l/Ha         | 8-10 l/Ha        |
| Olivo                  | 3-4 l/Ha         | 8-10 l/Ha        |
| Viña                   | 2-4 l/Ha         | 6-8 l/Ha         |
| Leguminosas            | 1,5-3 l/Ha       |                  |
| Remolacha              | 2-3 l/Ha         | 6-8 l/Ha         |
| Patata                 | 2-3 l/Ha         | 6-8 l/Ha         |
| Alfalfa                | 1,5-3 l/Ha       |                  |
| Coliflor, Brócoli      | 2-4 l/Ha         | 6-8 l/Ha         |
| Maíz                   | 1-2 l/Ha         |                  |
| Trigo-Cebada           | 1-2 l/Ha         |                  |
