

Plasmavit

DESCRIPTION

PLASMAVIT, a solution rich in organic matter with free amino acids, peptides and polypeptides of low molecular weight, providing essential nutrients such as phosphorus, potassium, iron and zinc.

Plasmavit, is obtained through an enzymatic hydrolysis process carried out on blood from the agri-food industry.

Due to its complete and varied content, a formulation with biostimulant properties is obtained when applied to crops, both in foliar applications, on the plant, or by applying it to the soil through irrigation, exerting a great effect on the rhizosphere, activating microbial flora and boosting rhizosphere processes.

FEATURES

- Induces greater **resistance to stress** and pathologies.
- Improves microbial activity, **enhancing beneficial flora and fauna**.
- **Increases the absorption and translocation of nutrients**, mobilising those that are present.
- Provides essential elements such as **phosphorus and potassium**.
- Provides totally soluble **Fe** and **Mn**.
- **Increases soil fertility** and improves soil structure.
- Increases the **quality and quantity** of harvests.

PROPERTIES

DECLARED CONTENT

AMINO ACID FERTILISER NPK 2-4-6	p/p
Free amino acids	2,0 %
Nitrogen (N) Total	2,0 %
Nitrogen (N) Organic	2,0 %
Phosphorus pentoxide (P2O5) Water soluble	4,0 %
Potassium oxide (K2O) Water soluble	6,0 %
pH	7
Density	1,16 g/cm ³

AMINOGRAM

Aspartic Acid, Glutamic Acid, Alanine, Arginine, Cysteine, Phenyl Alanine, Glycine, Histidine, Isoleucine, Leucine, Lysine, Methionine, Proline, Serine, Tyrosine, Threonine and Valine.

No amino acid exceeds 20% of the total of the total.

HANDLING AND DOSAGE INSTRUCTIONS

Plasmavit is compatible with most fertilisers and pesticides commonly used in agriculture. It should not be mixed with sulphur, mineral oils, cupric products, cupric organics or alkaline products. Given the variety of plant protection products that can be used, it is advisable, in case of doubt, to carry out a prior compatibility test or to consult the technical service. Do not apply to plum trees by foliar application.

RECOMMENDED APPLICATION PER CROP

CROP	Dose/Application	Dose/Application
Fruit trees	3-4 l/Ha	8-10 l/Ha
Horticulture	2-4 l/Ha	6-8 l/Ha
Ornamental plants	3-4 l/Ha	8-10 l/Ha
Olive tree	3-4 l/Ha	8-10 l/Ha
Vineyard	2-4 l/Ha	6-8 l/Ha
Legumes	1,5-3 l/Ha	
Beetroot	2-3 l/Ha	6-8 l/Ha
Potato	2-3 l/Ha	6-8 l/Ha
Lucerne	1,5-3 l/Ha	
Cauliflower, Broccoli	2-4 l/Ha	6-8 l/Ha
Corn	1-2 l/Ha	
Wheat, Barley	1-2 l/Ha
