**5-9-9**

## DESCRIPTION

**DUNYORGAN 5-9-9**, is an **ORGANOMINERAL N-P-K** fertilizer that provides a high content of organic matter together with essential elements such as **Nitrogen, Phosphorus and Potassium**.

The presence of composted organic matter enhances the efficiency of the nitrogen, phosphorus and potassium units provided, significantly increasing plant utilisation.

Its presentation in pellet form allows, on a practical level, a better distribution by means of mechanical application equipment and on a technical level, the pelleting process respects the properties of the organic matter as it does not suffer important variations in its chemical and biological properties during the pelleting process.

This ensures that the organic matter used retains 100% of its properties.

## FEATURES

- Supply of **N-P-K** nutrients necessary to meet crop demand.
- High content of **organic matter** essential for all root-plant processes.
- Presence of **beneficial micro-organisms** that increase the biological potential of the soil.
- Product free of **pathogens and weed seeds**, thanks to its composting process.
- Improved **mobilisation, retention and assimilation** of nutrients provided.
- Product made under strict controls of heavy metals and microbiological population.

## PROPERTIES

## DECLARED CONTENT

| ORGANO MINERAL FERTILISER NPK 5-9-9. Grupo 3.2.01 (RD 506/2013).                              | Porcentaje |
|---|------------|
| Nitrogen (N) Total  | 5,0 %      |
| Nitrogen (N) Organic  | 1,2 %      |
| Nitrogen (N) Ammonia  | 3,8 %      |
| Phosphorus pentoxide (P <sub>2</sub> O <sub>5</sub> ) sol. Neutral ammonium citrate and water | 9,0 %      |
| Potassium oxide (K <sub>2</sub> O) water soluble  | 9,0 %      |
| Carbon (C) Organic  | 12,0 %     |
| Humic acids   | 1,8 %      |

## HANDLING AND DOSAGE INSTRUCTIONS

Apply preferably as a background fertiliser. Before the beginning of **vegetative activity**. Its presentation in pellet form allows its mechanised application.

**Dosage:** The use rate is determined according to the starting level of soil fertility and the expected yield.

## AVERAGE DOSAGE

| CROP                   | Guideline Dose  | Mode of application                     |
|------------------------|-----------------|---|
| Fruit and citrus trees | 0,5 - 1,2 Tm/Ha | Apply before the beginning of sprouting |
| Horticulture           | 0,5 - 1,2 Tm/Ha | Apply during preparatory work           |
| Ornamentals            | 0,5 - 2 Tm/Ha   | Apply before the beginning of sprouting |
| Olive tree             | 0,5 - 2 Tm/Ha   | Apply before the beginning of sprouting |
| Vineyard               | 0,5 - 1 Tm/Ha   | Apply before the beginning of sprouting |
| Extensive Crops        | 0,5 - 1 Tm/Ha   | Apply during preparatory work           |

## PRESENTATION

Bulk / 24 Tm

Big-Bag / 600 Kg

Bag / 30 Kg  
Pallet / 1500 Kg
