

EnerGreen VITAL

DESCRIPTION

ENERGREEN VITAL is a liquid fertiliser rich in nitrogen, magnesium and sulphur. It is formulated with Glycine Betaine, which exerts an anti-stress action on the plant, against Abiotic stress situations, related to temperatures, salinity and drought. The application of Energreen Vital is recommended in phases where a rapid activation of the crop is required, either due to specific nutritional needs or some type of stress that limits the absorption of nitrogen, magnesium and sulphur.

FEATURES

Nitrogen is important for building plant mass and stimulating growth. It is also a basic component in the formation of proteins and amino acids. Magnesium forms the central atom of chlorophyll and is vital for the plant to be able to synthesise its nutrients. The use of Glycine betaine saves energy as the plant does not have to synthesise it. It guarantees a faster plant response to stress caused by lack of water, extreme temperatures, excessive light irradiation and salinity.

PROPERTIES

DECLARED CONTENT

LIQUID FERTILISER WITH MAGNESIUM AND SULPHUR	p/v	p/p
Nitrogen (N) Total	20,6 %	16,0 %
Nitrogen (N) Ammoniacal	5,1 %	4,0 %
Nitrogen (N) Nitric	7,3 %	5,7 %
Nitrogen (N) Ureic	7,4 %	5,8 %
Nitrogen (N) Organic	0,5 %	0,4 %
Magnesium oxide(MgO) water soluble	5,1 %	4,0 %
Sulphur Trioxide (SO ₃) water soluble	10,3 %	8,0 %
Glycine Betaine	3,2 %	2,5 %
pH	6-7	
Density	1,29 g/cm ³	

HANDLING AND DOSAGE INSTRUCTIONS

FOLIAR APPLICATION: 200-300 cc/hl de agua.

APPLICATION TO IRRIGATION WATER: 4-10 L/Ha.

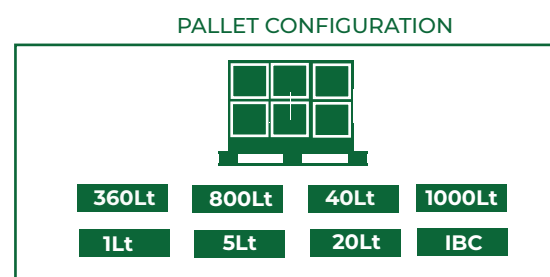

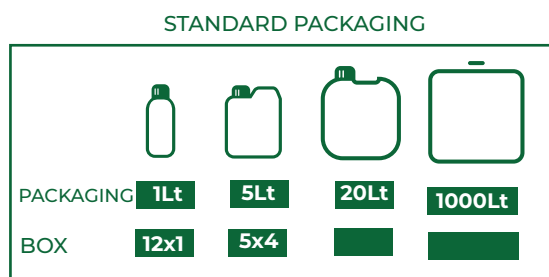

It is recommended to apply at times when it is necessary to increase vegetative activity.

RECOMMENDED APPLICATION PER CROP

CROP	Dose/Application	Dose/Application
Wheat and barley	2-3 l/Ha	4-6 l/Ha
Sunflower and corn	2-4 l/Ha	4-6 l/Ha
Legumes and oilseeds	2-3 l/Ha	4-6 l/Ha
Fruit trees	2-4 l/Ha	6-10 l/Ha
Horticulture	2-4 l/Ha	6-10 l/Ha
Extensive crops	2-3 l/Ha	4-6 l/Ha
Olive grove	2-4 l/Ha	6-10 l/Ha
