HANDLING AND DOSAGE INSTRUCTIONS

En Fertirriego, it is advisable to apply it alone or with mixtures of products whose compatibility we know for sure (chelates, etc.)

Once the application has been carried out, wash the irrigation circuit with water for 5 to 10 minutes to ensure that it is perfectly clean.

HANDLING AND DOSAGE INSTRUCTIONS

In foliar applications, it is compatible with most plant protection products and foliar fertilisers, with the exception of oils, low pH products and calcium.

Note: Its preferred recommended application is via soil, since we take advantage of the maximum potential of the product. However, in foliar applications, stimulating effects are observed on the crop in which it is incorporated.
