

RizoCal

DESCRIPTION

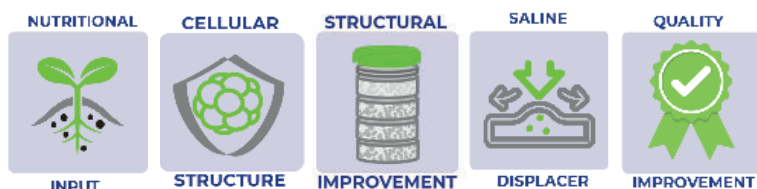

RIZOCAL is a Calcium corrector with Magnesium, in liquid form, ideal for adding Calcium to the soil and to increase the availability of soluble and active calcium in the soil. One of its main properties is characterised by its effect as a "Saline Displacer", thanks to the high contribution of calcium, magnesium and polycarboxylic acids, achieving the exchange of calcium for sodium in the soil, thus reducing the percentage of salts harmful to crops.

The presence of Polycarboxylic Acids enhances their effect by increasing the exchange points.

FEATURES

- Improvement of the physico-chemical properties of soils. Structure.
- Calcium source, totally active and easily assimilated by the plant.
- Balanced formulation with calcium, magnesium and polycarboxylic acids.
- Reduction of soil salinity.
- Correction of problems due to excess salts produced by high conductivity soils or water.
